Company.info for Salesforce
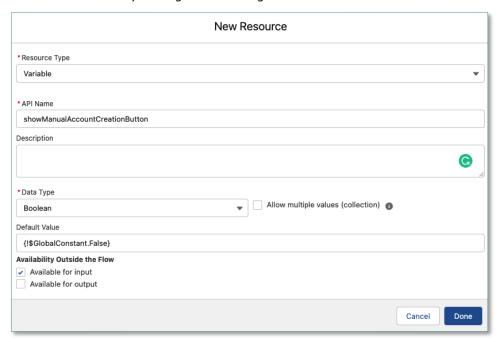

## KNOWN ISSUE

showManualAccountCreationButton

Release 5.5.4

If you previously cloned the Flow 'Create Account based on Company info data' **plus** you override the New Account button, you might get the following error when running the Flow:

There was a problem running this flow. Contact your system administrator with this error message: The input variable "showManualAccountCreationButton" doesn't exist in the active version of the flow "XXXXXXX".

This can be solved by adding the following **Variable** to the Flow:

1. The values should look like this:

That's it!
